# Harini Ravichandran

## Senior Product Designer | Fintech SaaS | AI Conversational UX

Bengaluru, India | +91 82485 64795 | mail.harini30@gmail.com | linkedin.com/in/harinir30 | Portfolio: designsbyharini.github.io/Portfolio

### SUMMARY

Product designer with 3+ years in UI/UX at a B2B fintech SaaS company, including 15 months as Lead UI/UX Designer, and 4 years in architecture before that. Designs end-to-end digital banking products across mobile, web, AI conversational banking and self-service kiosks. Led a team of 3 designers, built design systems, and partnered with product managers, engineers and bank clients from discovery to release. Seeking Senior Product Designer roles at fintech and product-based companies.

### SKILLS

**Domain:** Fintech, B2B SaaS, Digital Banking, Mobile Banking, Internet Banking, Conversational AI, Kiosk / Self-service Banking

**Design:** User Research, Journey Mapping, Service Design, Interaction Design, Information Architecture, Wireframing, Prototyping, Conversational UX, UX Writing, Design Systems, UI Design, Usability Testing

**Leadership:** Design Team Leadership, Mentoring, Design Process, Stakeholder Management, Client Presentations, Cross-functional Collaboration

**Tools:** Figma, FigJam, Framer, Notion, AI tools for prototyping, UX writing and design critique

### EXPERIENCE

**Techurate Systems Private Limited**, Bengaluru — Jun 2023 – Aug 2026

**Lead UI/UX Designer** — May 2025 – Aug 2026

**UI/UX Designer** — Jun 2023 – Apr 2025

B2B fintech SaaS product company building digital banking platforms for banks and financial institutions.

- **Team leadership:** Promoted to Lead UI/UX Designer in May 2025, reporting to the Managing Director. Led a team of 3 designers, set up design process and rituals, and mentored juniors. Partnered with PMs and engineers from discovery to release and presented work to bank clients.
- **AI Conversational Banking (BankGPT):** Designed an AI-powered chat and voice banking assistant that lets customers complete banking tasks through natural conversation. Demonstrated at the 29th Connected Banking Summit, Ethiopia 2026.
  - Started with low-risk, read-only tasks (balance enquiries, mini statements) to earn client trust in AI, then expanded to fund transfers, bill payments and end-to-end loan applications.
  - Defined conversation flows, user intents, prompts and response patterns, including confirmation steps for transactions and secure authentication.
  - Designed error, fallback and low-confidence states, plus handoff to human support.
  - Combined conversational and visual UI (cards, quick replies, forms) so complex tasks stay clear and trustworthy.
- **Digital Banking (Mobile and Internet Banking):** Designed end-to-end journeys for iOS and responsive web, including account opening and onboarding, accounts, fund transfers, payments and service requests. Designed a safe-to-spend feature inside an existing internet banking app.
- **Smart Branch (Kiosk Banking):** Designed self-service touchscreen kiosk journeys for in-branch banking, using service design and journey mapping to connect customer, kiosk and branch staff touchpoints.
- **Design Systems:** Built and maintained design systems in Figma with reusable components, tokens and usage guidelines, improving consistency and speeding up design-to-development handoff.

**Architect** — 2019 – 2023

4 years in architectural design: planning spaces around how people actually move through them, the same thinking I now apply to user journeys.

### AWARDS

**Rising Star Award**, Techurate | **Quarterly Appreciation**, Techurate (Oct–Dec 2023)

### EDUCATION & CERTIFICATIONS

**Bachelor of Architecture (B.Arch)**, Periyar Maniammai University, Thanjavur | 2014 – 2019

**UX Mastery**, Growth School | **UX Blaze Programme**, UX Gym
