Harini Ravichandran

Senior Product Designer | Fintech SaaS | AI Conversational UX

Bengaluru, India | mail.harini30@gmail.com | linkedin.com/in/harinir30 | Portfolio

SUMMARY

Senior Product Designer with 3+ years leading UI/UX at a B2B fintech SaaS product company and 4 years in architecture. Designs end-to-end digital banking products across mobile, web, AI conversational banking and self-service kiosks. Leads design teams, builds design systems and partners with product managers, engineers and bank clients. Seeking product design roles at fintech and product-based companies.

SKILLS

Domain: Fintech, B2B SaaS, Digital Banking, Mobile Banking, Internet Banking, Conversational AI, Kiosk / Self-service Banking

Design: User Research, Journey Mapping, Service Design, Interaction Design, Information Architecture, Wireframing, Prototyping, Conversational UX, Design Systems, UI Design, Usability Testing

Leadership: Design Team Leadership, Mentoring, Design Process, Stakeholder Management, Client Presentations, Cross-functional Collaboration

Tools: Figma, FigJam, Framer, Notion, AI tools

EXPERIENCE

Lead UI/UX Designer, Techurate Systems Private Limited, Bengaluru — Jun 2023 – Aug 2026

B2B fintech SaaS product company building digital banking platforms for banks and financial institutions.

- **Team leadership:** Led a team of 3 designers, set up design process and rituals, and mentored juniors. Partnered with PMs and engineers from discovery to release and presented work to bank clients.
- **Digital Banking (Mobile and Internet Banking):** Designed end-to-end journeys for iOS and responsive web, including onboarding, accounts, fund transfers, payments and service requests.
- **AI Conversational Banking:** Designed an AI-powered chat and voice banking assistant that lets customers complete banking tasks end to end through natural conversation.
  - Covered the full service range, from balance enquiries and mini statements to fund transfers, bill payments and end-to-end loan applications.
  - Defined conversation flows, user intents, prompts and response patterns, including confirmation steps for transactions and secure authentication.
  - Designed error, fallback and low-confidence states, plus seamless handoff to human support.
  - Combined conversational and visual UI (cards, quick replies, forms) so complex tasks like loan applications stay clear and trustworthy.
- **Smart Branch (Kiosk Banking):** Designed self-service touchscreen kiosk journeys for in-branch banking. Applied service design and journey mapping to connect customer, kiosk and branch staff touchpoints.
- **Design Systems:** Built and maintained design systems for internal products in Figma, with reusable components, tokens and usage guidelines, improving consistency and speeding up design-to-development handoff.

Architect, 4 years of experience in architectural design — 2019 – 2023
